CS 82A - Module 1 Lab 1: Hello, Data Science

Student: Krystal-Rose Uduma

This review copy follows the Canvas instructions. Run the notebook top to bottom and keep every output visible.

Step 4 - First Python output

Display the exact greeting requested in Canvas.

Code

```
print("Hello, Data Science!")
```

Output

```
Hello, Data Science!
```

Step 5 - One-row pandas DataFrame

Create the required week and status columns.

Code

```
import pandas as pd

pd.DataFrame({
    "week": [1],
    "status": ["ready"]
})
```

Output

```
week status
0     1  ready
```
